INNOVATING TRAINING

2023

Product Catalog

About us

Extreme Simulations develops and manufactures innovative medical simulation products and for pre-hospital and in-hospital training settings. Our proprietary products feature realism, durability and ease of use and service.

All our products are validated by leading medical and emergency organizations from Israel and the UK.

Our mission is to help minimize preventable death rates in healthcare by creating fully immersive training experiences so that "YOUR FIRST INCIDENT SHOULD FEEL LIKE YOUR SECOND".

SPECIALIZED PROJECTS

With over 10 years of experience in providing tailor made products, from surgical pads, through task trainers and manikins, and up to full scale training centers, our team of expert designers, technicians and engineers will provide you with a product that suits your exact need in a very short lead time.

Among the clients which ordered specialized products: The National Health Service – UK (NHS), Greenwich University, UK Fire & Rescue institutions, Sheba Medical Center, Police Counter Terror Unit, Home Front Command units, IDF Medical Corp. Years of experience in providing high-end tailor made products, made us the most qualified team for developing innovative products that do exactly what you need them to do. What ever you need us to do, we will make it happen!

LifeSupport[®] - Robust, Ready and Reliable

A resuscitation manikin specifically designed and manufactured for use during Advanced & Immediate Life Support courses.

REALISTIC AND CORRECTLY
POSITIONED ANATOMICAL
LANDMARKS

ORAL PHARYNGEAL AND
NASAL PHARYNGEAL AIRWAY
INSERTION

PERFORM CHEST
COMPRESSIONS

Produced by *Extreme Simulations* in partnership with *Simulation Man*. A team with decades of experience in the design and implementation of Advanced Life Support training products.

LifeSupport[®] is designed for the practical elements of Advanced and Immediate Life Support courses, which are accredited and governed by resuscitation councils throughout the world.

This system has the primary aim to ensure that faculty can be reliant on a robust and reliable device, that meets the standards needed for intense repeated use within the clinical training environment.

LifeSupport[®] is compatible with existing peripheral training equipment and can be used with minimal disruption, enhancing the learner experience during training courses.

LifeSupport Manikin

ADVANCED AIRWAY:

- Head tilt, chin lift and jaw thrust manoeuvres
- Oral Pharyngeal and Nasal Pharyngeal airway insertion
- Endotracheal intubation
- Insertion of Supraglottic airways

CHEST COMPRESSIONS:

- Perform chest compressions in adherence to many international resuscitation guidelines
- Correct anatomical landmarks
- Ability to be used in conjunction with mechanical CPR devices
- Optional spring variability

APPEARANCE:

- Older adult male, accurately representing the demographic of patients most at risk of an acute medical emergency
- Realistic and correctly positioned anatomical landmarks
- Built with robust and quality components

Our ALS LifeSupport manikin now comes with the possibility to add arm and legs to create a full body ALS manikin.

If you are interested in adding wounds or procedures (IV,IO etc) to the limbs, please contact us and we will make it happen.

LifeSupport Manikin – upper Body Catalog number: – ESLS001

LifeSupport Manikin – Full Body Catalog number: – ESLS002

Technical Specifications – LifeSupport Manikin

Functionality

Advanced airway	Life- like anatomically correct and visually accurate airway. Anatomically correct nasal airway with nasal cavity. Direct laryngoscopy with Midline tongue sweep. Endotracheal Intubation size 8-9 ET tube Supraglottic airway, I-gel / Laryngeal mask Oropharyngeal and Nasopharyngeal airway insertion Bag Valve Mask ventilation Single lung intubation possible. Right-main stem intubation possible.
Chest Compressions	Realistic chest compressions meeting resuscitation guidelines. Chest spring standard spring 50kg, other springs optional Ability to be used in conjunction with mechanical CPR devices Welded Spring base for robust and high-volume chest compressions.
Mannequin	Represents an adult male of the demographic more likely to suffer an acute event. 50+ aged Male with lifelike features Lifelike skin representation. Anatomically correct face Anatomically correct torso Anatomically correct chest with landmarks for xyloid sternum and suprasternal notch. Palpable ribs. Clicker with on/off function Steel joints for movement
Peripherals	Can be integrated with existing technology peripherals for simulated patient monitoring and
Dimensions	Weight: 15.5kg Length: 104cm Width: 40cm Height: 24cm
Materials	manikin: silicone, fibreglass, urethane, steel Airway: silicone Spring: steel, Adjustable weight values available Teeth: Urethane

Andrew First Response

A manikin for emergency medical care and tactical training

EXCEPTIONALLY DURABLE –
SPECIALLY DESIGNED FOR
TACTICAL TRAINING

IDEAL FOR PRACTICING
ESSENTIAL LIFESAVING SKILLS

INNOVATIVE MEDICAL
SIMULATION PRODUCT

Andrew First Response is the ideal manikin for training first responders, in emergency medical care, and tactical skills in true to life settings.

This is the toughest manikin in the market, featuring realism, durability, simplicity of use and maintenance. The Andrew First Response is the perfect tool for training EMS, law-enforcement agencies, military, fire-fighters, and Search & Rescue units in essential lifesaving skills

Applying tourniquet

Packing procedure

Airway insertion

Joint mobility

www.extremesimulations.com

Andrew First Response

THE TOUGHEST MANIKIN IN THE WORLD

The only manikin suited uniquely for training first responder's in real-life extreme settings.

The frame is fully TIG welded steel, all joints are metal using the strongest and flexible available on the market. This brings the durability to the highest level possible enabling you to train harder, knowing you can completely rely on your training equipment

Catalog number: ANDFR001

Technical Specifications – ANDREW First Response

Arms	interchangeable
Weight	60 Kg
Height	175 cm
Frame	Fully tig welded steel
Joints	Metal
Skin Silicone standard	Platinum Silicon
Casing	Fright Case
Documents	User Manual + Warranty certificate + Technical Spec

Steve - Search and Rescue Manikin

A Manikin for disaster and rescue training

SUBMERSION: ABILITY TO ADD UP TO 16KG IN WEIGHT TO ALLOW COMPLETE SUBMERSION

FULL BODY AND LIMB ARTICULATION

BASIC AIRWAY MANAGEMENT

Tested and validated by leading Fire and Rescue institutions in the United Kingdom. Natural articulation of body and limbs + realistic look and feel. Our new Steve manikin Includes the ability to float and submerge. Steve is the ideal manikin for Search and Rescue Training, for any scenario you may encounter Water rescue, Disaster sites, fire rescue, mountain rescue.

Catalog Number: STSAR001

Technical Specifications

Weight	52 Kg
Weight change	includes containers, 4 liters in volume, which allow adding up to 16 kg in weight (according to content) for submersion of the manikin for water rescue training.
Height	182 cm
Top of shoulder to fingertips	78 cm
Armpit to fingertips	64 cm
Hip to toe	108 cm
Inside leg to toe	95 cm

Louis

Tourniquet and Packing Task Trainer

EXCEPTIONALLY DURABLE AND
SUITED FOR FIELD TRAINING

SEVERAL PENETRATING WOUNDS
THAT REQUIRE TREATMENT FROM
DIFFERENT ANGLES

LOOKS AND FEELS
LIKE A REAL LEG

Louis is a compact bleed control task trainer which combines essential technical training with challenges and dilemmas.

Louis looks and feels like a real human leg with an amputation below the knee and 2 packing wounds.

Creates a challenge with applying the tourniquet in the knee area.

Packing wounds which demand treatment from different angles.

For orders & enquiries please contact: info@extremesimulations.com | +14387285658

www.extremesimulations.com

Task Trainer | Louis

A COMPACT TOOL FOR PRACTICING TOURNIQUET & PACKING SKILLS

- Looks and feels like a real leg
- The bleeding does not stop if the tourniquet is applied to close to the amputation
- Specially designed for outdoor training
- Bleeding stops only when tourniquet is applied correctly
- Robust, Reliable
- Straightforward operation
- Simple maintenance – no electronics
- Ideal solution for field training - does not require a table

Catalog Number: ESLPT001

Technical Specifications- Louis

Diameter of Limb at the base	55.25 cm
Diameter of Limb at the Knee	34.5 cm
Length	47 cm
Weight	5.5 Kg
Height	26.5 cm
Connectors	Male – Steel - CPC
Casing	Fright Case
Documents	User Manual + Warranty certificate + Technical Spec

Josh - Lower Body 3 Procedure Task Trainer

The Perfect tool for Packing, Tourniquet, and Pressure Point Training

3 DIFFERENT PROCEDURES IN ONE TASK TRAINER: PACKING, TOURNIQUET, AND PRESSURE POINTS

ROBUST AND SIMPLE TO OPERATE

ENABLES APPLYING PRESSURE TO POINTS ON THE GROIN AND THE THIGH

Extreme Simulations is proud to introduce:

A first of its kind lower body (pelvis to legs) task trainer, featuring 3 procedures: Packing, Tourniquet and Pressure points. The ultimate product for training your team in all procedures to stop bleeding in the field.

Tourniquet

Packing

Pressure points

Wearable Wounds

The best solution for upgrading your manikins and for MCI training

SPECIALLY DESIGNED FOR
MEDICAL MANIKINS AND
SIMULATED CASUALTIES

HIGHLY REALISTIC, DURABLE
AND SIMPLE TO OPERATE

FITS A WIDE RANGE OF
BODY SIZES

Our wide range of wearable wounds, made from top-end silicone, are designed for realism, accessibility and durability. The wounds are intended for use on medical manikins or simulated casualties, and include the following:

- CUTS
- BULLET WOUNDS
- SEVERE WOUNDS
- BURNS

Table of Products – Wearable Wounds
